#### DROUTH AND HURRICANE

BOTH CAUSE GREAT LOSS IN POR-TIONS OF AUSTRALASIA.

Military Aeronaut Killed-Output of Gold in New South Wales and

er Warrimoo arrived here to-day from at English's Opera House yesterday after-Sydney, bringing Australian advices to noon, Mr. Creston Clarke found full scope Nov. 7. On account of the drouth during | for his peculiar fresh and breezy style of the past year the pastoral farming, dairy- acting. In the second act, which is the one ing and mining industries have been in a | that contains the famous pretended intoxistate of stagnation, with the result that | cation episode, he was unusually strong at large numbers of men were thrown out of points calling for strength and at others employment. Great distress has prevailed | delicate with the delicacy of a mother carthroughout the various colonies, alleviated in part by government expenditures on hide his hopeless passion from one who been expended on public works, in which Garrick remembered his promise to Ada 8,000 men were employed. Fortunately the drouth was broken in October, general by feigning drunkenness, he presented a rainstorms being reported, and in November the heaviest snowstorms on record were experienced in Victoria. Warmer weather followed.

Details are brought of a terrible windstorm which swept over the colonies, causing great damage. The storm was most disastrous at Newcastle, passing over the city about the middle of the afternoon of Nov. 6, and during the twenty minutes it lasted damaged property in that city to the extent of several hundred thousand dollars. A peculiar rumbling noise betokened the near approach of the hurricane, and a few seconds later the whole district was enveloped in a giantic duststorm. Business in the city was entirely suspended. Over three hundred houses were unroofed and several buildings were leveled to the ground. The most serious casualty was the collapse of the Adamstown Roman Catholic School, in which forty children were assembled. One pupil was killed and two others seriously injured. Great havoc was played with shipping in the harbor, and a number of vessels drifted ashore.

At Christ Church, New Zealand, Capt.

At Christ Church, New Zealand, Capt. Lorraine, a military aeronaut, of the first cently lost his life in making an ascent. Soon after the bailoon cleared the ground the parachute became freed and fell to turn the baloon over so as to allow the gas to escape, but his efforts were unavailing and as he had no knife with him he

The yield of gold in the various Australasian colonies is much larger this year than in 1898. In New Zealand an increase of 25 per cent. is reported. In New South Wales the output for ten months is 70,000 ounces greater than for the twelve months last year, and there is promise that the returns for the entire year will be the largest in the past thirty-six years. If the present rate of yield is maintained the output for the year will reach about 490,000 ounces. This has only been eclipsed on three occasions since the date of the discovery of gold in the colony in 1851. In New Guinea, lowever, conditions are not so good. The miners are reported as ekeing out but a miserable existence, while the fever scourge is rampant. So deathly is this fever that of two hundred men working in one mine only seventy survived an attack of the scourge. The bad climate of the New Guinea gold fields is said to make the curing of a wound, or the mending of a brok-en limb incredibly long and painful, if not practically impossible.

was helpless. The balloon drifted in the

direction of the coast and went higher and

higher until it disappeared from sight. Lat-

er the balloon was seen to fall into the

#### TO SECURE PURE WATER.

#### A Young Indiana Scientist Advocates Use of Microscope

An interesting paper dealing with an important source of water contamination, in which the importance of microscopical, as well as merely chemical, examination of siding. our water supply, was one of the features of the regular monthly pharmaceutical meeting, held at the Philadelphia College of Pharmacy last Wednesday. "Algae as a Cause of the Contamination of Drinking Water" was the paper's title and it was read by Dr. G. T. Moore, of Dartmouth College. Dr. Moore was formerly of Indianapolis, where he was born and educated, leaving here to become an instructor at Harvard University, later going to Dartmouth. The paper, as reported in the Philadelphia Press, reads, in part, as fol-

"The large attention now paid to the subject of a sanitary water supply shows the importance attached to the subject. The consideration of all questions affecting the water supply was formerly left almost entirely to the engineer; and topothe only ones brought into play when the question of a water supply was considered. Later the skill of chemists was called in to aid in solving the important problem. that chemical analysis alone is

ficient to determine the quality of water. It must be supplemented by thorough microscopical study. Indeed, chemical analy- ance was large during both morning and sis is often of little use unless joined with afternoon sessions, and most of the time a thorough biological investigation. "As holders and disseminators of bac-

teria, algae in water cause more trouble perhaps than any other member of the address contained many suggestions along vegetable kingdom. With some of the forms, such as that commonly called frog's spawn, we are tolerably familfar. But it is not to these easily discernible forms that we have to trace the causes of pollution. Their presence in the water may be a source of mechanical difficulty when it becomes a question of eradication, but their presence is probably more often a benefit than otherwise. "It is what are known as the blue-green

algae that bear the greatest part in the pollution of the water. These do not always present a blue-green appearance; they are sometimes reddish, brown or chocolate-colored. These colors may be due to the presence of various coloring substances in the water, although there may be physical rea- New York Underwriters and H. M. Smith, sons, such as peculiarities of refraction. The way in which these forms repro duce themselves is a very important matter. Some of them produce large, thick-walled cells, which act as spores for the reception of bacteria. These may lie in the water a long time with no evidence of their presence and the water is presumed to be perfectly pure, but when the proper conditions arise they may begin to affect the water very unpleasantly. Shallow, stagnant water and a high temperature seem in general most favorable to their development, and consequently the chief

trouble arises in the summer time. "No single remedy can be expected to remove the disagreeable effects of all these forms, as they differ in nature. We have made a good beginning in their study; we have some information in regard to their nature and some statistics concerning their effects, but what is needed now is a thorough microscopical study of the subject. something more than a chemical analysis water we may expect that there will be a demand for investigation of the kind indicated, which will be fruitful of good re-

## The Pet Stock Show.

The indications are that the exhibit of poultry and pet stock at Tomlinson Hall will be the largest that the great poultry State of Indiana has yet produced. Unusual interest is manifested and entries are coming in from all parts of the State, the one and one-third rate on railroads in Indiana proving quite an inducement to breeders and others interested in the poul-

A feature of the show will be a few new varieties of birds that the public is not familiar with and as they are only bred by a few poultrymen at this time. The pigeon and pet stock department will also be well filled, the fanciers of the former being unusually enthusiastic in the work.

of Pittsburg, to testify in regard to the window-glass trust, of which they are at the heead. While Mr. Hadley was in Pittsburg he was refused any information by the president of the trust, who went so far as to refuse a subpoena to be read to him by the constable. The State has brought sult against the glass companies at Anderson and Mr. Hadley was seeking information to be used it

#### SEEN IN TWO PLAYS.

#### Mr. Creston Clarke's Appearances at English's Opera House.

In "David Garrick," which was presented essing her child, or of a lover striving to public works. In Sydney alone \$1,200,000 has does not reciprocate its warmth. As long as Ingot's father to disgust the young woman lively portrayal of one whose brain has been set topsy-turvy by the fumes of liquor, but at times the sight of the girl's mute suffering (for she really loved Garrick) made him pause and resume his natural seif again. All these phases of emotion were handled by Mr. Clarke with the tact and One must indeed have possessed a jaundiced eye or an uneasy stomach not to have realof art. Mr. Clarke's company shone to better advantage in "David Garrick" than in "The Ragged Cavalier." Many of them seem more at home in the lighter roles of comedy than in the more serious work demanded by romance. Miss Prince had a most exacting part in that of Ada Ingot, and at times was not all that could be desired. Her personal beauty and sweet dignity, however, tend largely to disarm criti-

"The Last of His Race," noted on the programme as Mr. Clarke's own compos tion, brought the engagement to a close last night. This play is very strong, in fact, a triffe too strong in portions of it, placing it in the class of melodrama, which relentother circumstances. His support was entirely adequate, except in minor particulars. P. S. Barrett as Niclovitch and of Miss Edith Gale in her dual role of Clovis, the old Russian family servant, and of the Countess Champeey, deserves mention. It will be pleasing information to the new friends of Mr. Clarke has made during his brief stay in Indianapolis that he will probareturn later in the present season, at "Hamlet" and possibly "The Bells," made famous by Sir Henry Irving. In both plays he is said to appear to better advantage than in his offerings at this engagement.

#### SUFFRAGE CONFERENCE.

#### A Partial Programme for the Event Has Been Arranged.

The following programme has been arranged for the Woman's Suffrage conference to be held at Plymouth Church this week, Dec. 7 and 8. This is not the full programme, because several speakers have not yet responded to invitations, and some changes may be necessitated. Thursday afternoon, 2:30 o'clock, Miss

Opening prayer. Welcome .....Governor James A. Mount 

Friday afternoon, 2:30, Miss Hay pre-"Does the State Need Woman Suffrage?"

#### WITH COLORED COACHMAN.

The Wife of a Prominent White Man Elopes to Cleveland.

A dispatch last night from Cleveland, O., stated that a white woman, wife of a prominent man of this city, had been arrested there yesterday for eloping with a colored man. Nothing could be learned last night as to the time of her leaving or the identity of her companion.

Friends and relatives of the woman were

greatly shocked the latter part of August when she was arrested and fined in Police Court for drunkenness and disorderly conduct. On the night of Aug. 22 she was arrested in company with Frank Woods, her colored coachman. Another woman who was with them made her escape. The trio had been making the rounds of the colored drinking resorts, some of which were notorious, and all were intoxicated. Their zens complained to the police, and when they arrived at Indiana and Capitol avenues they were arrested. The woman when found by the police was, as they expressed it, very drunk, and what little of her clothng she yet wore was badly torn. Her father called at police headquarters o give bail, but she refused to go with him unless her companion was also released. She was finally forced into a carriage and

## THE THEATRICAL SYNDICATE.

Actor Harrigan Says It Is an Injury

Philadelphia Telegraph. "What do I think of the American drama? What do I think-?" and Harrigan, the dramatist and comedian, gave a little chuckle as he paused to resume his preparations for his vaudeville sketch, "McSorley's Inflation," in his dressing room. Mr. Harrigan did not lose a minute as replied to the query. He just smiled, reat the grease pot. It was simply impos-Alfred Burns, of Paris, Ky, and J. H. sibie to avoid recalling the triumphs scored by Harrigan during the past two years as he sat there facing his mirror. At once the most successful and the most faithful portrayer of life as it is in the poorer vards as well on the West Side of New York, Harrigan has done more to further Russell appeared at police headquarters to give bail for Burns, and was locked up on account of his actions. Burns had a bank work. He has been satisfied with the truth as he saw it, and the public has amply approved his work. But with this record of success by no means ancient, the question its from Victoria, called on Lord Carnavon arises: Where has Harrigan been during the | in Downing street, and in conversation past few seasons? Those who formerly vis- chanced to introduce a reference to Sir ite the old theater go there to-day in vain- George Grey. "A very strange and incomif they are looking for the old article. They prehensible character," said Lord Carnavon, must go to the vaudeville if they would with a shake of the head; "I hear he has on the linishing touches of his make-"Now, what do I think of the Amer ican drama?" he repeated, and a daub of rouge landed on one cheek, while a brushful on the other cheek was accompanied by the remark, "The drama? Where is it?" And as he fitted on his brick-red wig he half-caste female, of course. Is that not turned to his visitor and asked, "Have you so?" "Certainly not; a wallaby is simply a it with you? To properly answer that query of yours I should see the article before ex-

pressing an opinion. All ready for the signal of the call boy Peter McSorley turned to entertain Mr. "Why, my dear boy, has any one been telling you that there is such a thing as American drama? I cannot say what I think of a thing that does not exist, and from what I can see I do not think there will be a distinctively American drama for some years to come. Why? Simply because the theatrical business has passed into the control of a body of speculators whose only eye is on the box office, and who insist on keeping their feet on the necks of the au-If speculators continue to run a business which calls for the material produced by men's brains in such a way as to impoverish the writers they will simply push forward the work of deterioration until the theater will become so trashy as to willing to suffer heavy financial loss.

be utterly unworthy of further toleration. Just at this point Mr. Harrigan was shown an article printed in a New York paper to the effect that the organization known as the theatrical syndicate would be dissolved at the termination of the time limit of the agreement on which the syndicate was formed. After reading it he remarked: "So, there is war in Denmark after all. Well, it cannot come too soon. No actormanager has ever been able to fight this body of speculators. I found that I could not stay in New York unless I would be saw what the result of the syndicate's work would be and I resigned in time. I cannot be satisfied with a season of four or five weeks in New York; I must have a season that many months in length at least. Unable to have it I have repaired to the vaudeville. Why, even Daly could not fight them, and Mansfield was worsted as well. thor no profit for his work, and how many writers are there willing to continue at that rate? The result of all this is apparent in the lack of equality shown in stage productions. All one can see on the stage to-day is ridiculous burk sque, buffoonery or farce. No one is drawing a type of life as it really exists. The Irish are slandered and the tle of what is required. Most of plays that eight or nine people, and who could expect "Mr. Crane's play, 'Peter Stuveysant,' is a great production. It is instructive, and

Dutch, and another thing worthy of notice,

it is clear and wholesome in every line.

in the house, from front to the

Cleanliness and wholesomeness is what want. I have never written a line which would bring a blush, and I never will. O course, a manager must make money; he can't be blamed for putting on a play that draws. But what about the public? Did you ever hear of the public producing a play? No; it is the manager who does that. Now, I believe the public is a pretty good fellow, and if given a chance to patronize the clean plays it will respond in profitable style. Sometimes good plays are failures. I don't know why, but sometimes they succeed, as did 'The Little Minister.' "I was a New York boy; spent most of my life in the lower wards of the city, lived with the working people, associated with the middle class and some of the upper ten. I know every corner, bulkhead, and pier of New York, and observation, a quality well developed in my make-up, has enabled me to show the world the drama of life as I have seen it."

## Shocking Sir George Grey.

The late Lord Carnavon, when colonial secretary, officially recorded his opinion of now withdrawn to an island off the coast of These reflections were interrupted by the New Zealand and surrounded himself with Charles. "You surprise me," rejoined Lord Carnavon; "what must be the state of of such a proceeding?" "Why, my lord, what do you suppose a wallaby to be?" "A
